Alpharetta, GA • 470-546-1742 • sunilkdas.dev@gmail.com • linkedin.com/in/sunilkdas • U.S. Permanent Resident (Green Card)

PROFESSIONAL SUMMARY

Technical Leader with 10+ years of experience building microservices and distributed systems for enterprise supply chain and logistics companies. Proven track record leading engineering teams, reducing system load times by 87%, and delivering 99.9% uptime at scale. Expert in Java/Spring Boot, RabbitMQ, Hazelcast, and cloud-native architectures on GCP. Deep domain expertise in Transportation Management Systems (TMS) and EDI. Actively building with generative AI: RAG pipelines, pgvector, LangChain, and Ollama.

CORE TECHNICAL SKILLS

Languages & Frameworks: Java 8/11/17, Python, Spring Boot, Spring Cloud, Spring MVC, Spring Security, Hibernate, JPA, REST APIs, Microservices Architecture, Event-Driven Architecture, Design Patterns, OOP, Multithreading, Concurrency

Cloud & Infrastructure: GCP (GKE, Pub/Sub, Cloud Functions, Compute Engine, Cloud SQL), AWS (EC2, S3, Lambda, RDS, VPC, IAM), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD, Zuul Server

Data & Messaging: Oracle SQL, PostgreSQL (pgvector), MongoDB, MySQL, RabbitMQ, IBM MQ, Apache Kafka, ActiveMQ, Hazelcast, HikariCP, Elasticsearch, Solr

DevOps & Monitoring: Dynatrace, Splunk, New Relic, ELK Stack, Kibana, Grafana, Prometheus, Log4j2, SLF4J, Maven, Gradle, Git, Bitbucket, kubectl, Telepresence

Architecture & Design: Distributed Systems, System Design, High Availability, Fault Tolerance, SOLID Principles, SOA, API Gateway, Caching Strategies, Load Balancing, SRE Practices

Security & Compliance: OAuth2, JWT, SAML, Active Directory, LDAP, OWASP Top 10, HIPAA, GDPR, CCPA, WCAG Accessibility, CVE Remediation, PHI/PII Protection

Supply Chain & Domain: TMS, Route Optimization, Real-time Tracking, Fleet Management, Carrier Management, EDI (X12 204/214/210/997), Shipment Visibility, ETA Calculation

Testing & Quality: JUnit, Mockito, TestNG, TDD, Integration Testing, SonarQube, Performance Testing, Load Testing, Incident Management

AI / ML: RAG Pipelines, pgvector, LangChain, Ollama, Docling, TTS, Vector Embeddings, Semantic Search

PROFESSIONAL EXPERIENCE

Lead Engineer — Manhattan Associates (US-based Supply Chain SaaS)

Jan 2020 – Sept 2025 | Bangalore, India

- Owned end-to-end delivery of the Dispatch module — from design to production — covering trip planning, carrier assignment, and dispatcher workflows for 100K+ concurrent trips.
- Reduced Dispatch screen load times 87% (15s → 2s) by redesigning caching with Hazelcast and optimizing HikariCP connection pooling.
- Built and maintained CI/CD pipelines (Jenkins) for both Dispatch and TMS Mobile, enabling weekly production releases with security scanning.
- Owned end-to-end delivery of TMS Mobile app (Ionic/Angular) — 1K+ daily active drivers, 25+ backend API integrations, Firebase real-time updates; collaborated with Product, UX, and Customer Success.
- Built real-time tracking in TMS Mobile using Firebase and GPS serving 50K+ daily shipments with live ETA calculations.
- Developed and maintained shipment processing and tracking message pipelines on RabbitMQ.
- Managed Elasticsearch for shipment search handling 1M+ daily queries; used feature flags for gradual rollouts.
- Managed EDI pipeline (X12 204/214/210/997) processing 500K+ monthly transactions covering invoice generation, tax validation, and carrier acceptance.
- Worked with the platform audit framework to meet US DOT transaction trail requirements.
- Optimized database queries and indexing strategy, reducing database CPU utilization 55% while supporting 2x user growth.
- Mid-tenure: led Dispatch team, conducted architecture reviews, technical design sessions, and participated in hiring panels.
- Supported legacy Supply Chain Planning Platform (SCPP) — daily ticket resolution, feature development, regression fixes, and production issue triage.

- Participated in on-call P1/P2 rotation for 50+ enterprise clients; contributed to incident response and blameless post-mortems.

Engineer II — J.C. Penney (Major US Retailer)

Jan 2020 – Jun 2020 | Bangalore,

- Managed Product Listing Page (PLP) and Product Detail Page (PDP) on high-traffic retail e-commerce platform.
- Built A/B testing infrastructure and personalised daily offer rendering engine serving targeted promotions based on user profile and behaviour.
- Delivered 40% web application performance improvement through asynchronous loading and front-end optimisation techniques.
- Collaborated with cross-functional Agile team of 8+ engineers; ensured WCAG 2.1 accessibility compliance across consumer-facing interfaces.

Associate — Cognizant (Etihad Airways Client Engagement)

2019 – 2020 | Bangalore, India

- Developed fault-tolerant REST APIs for airline consent-management platform with 99.9% uptime, supporting global passenger data privacy and regulatory compliance.
- Created multi-lingual custom email template support; built scalable backend workflows handling passenger consent requests across multiple jurisdictions.

Technology Analyst — Infosys (Aetna Healthcare Client)

2015 – 2019 | Bangalore, India

- Built enterprise authentication and authorization system (Spring Security, Active Directory/LDAP, JWT) serving 50,000+ healthcare users with 99.95% availability, ensuring HIPAA compliance.
- Implemented PHI access controls, audit logging, session management, and Section 508-compliant web interfaces with HTML5/CSS3/JavaScript/jQuery/Bootstrap.
- Mentored 3 junior engineers on Spring framework, OWASP secure coding practices, healthcare compliance, and enterprise development standards.

EDUCATION

Bachelor of Technology — Electrical & Electronics Engineering

IIIT Bhubaneswar, India | CGPA: 8.35/10

PERSONAL PROJECTS

AI-Powered Audiobook Generator | Python, Docling, PostgreSQL pgvector, LangChain, TTS

- Built end-to-end pipeline converting web pages to MP3 audiobooks: web scraping → Docling parsing → pgvector semantic retrieval → AI summarization → TTS audio generation.
- Implemented PostgreSQL pgvector with embedding-based retrieval for context-aware summarization using RAG patterns.

AWARDS

- Star of the Quarter — Manhattan Associates: outstanding technical leadership, innovation, and team impact.
- Zircon Award — Infosys: exceptional performance and significant contributions to project success.
